Rate Increase for 2021

What does this mean to you?

Beginning on February 1, 2021, the average Consolidated residential customer will experience a \$2.74 per month increase in their water bill.

How'd we get there?

In balancing all the necessary construction projects, pipeline maintenance and replacements, rising cost associated with materials and labor, and purchasing and storing raw water, our value of service analysis resulted in a water usage charge of \$5.40 per 1,000 gallons – with no 'tiering' structure for usage – and a monthly service fee of \$22.70 per 3/4" and \$18.70 per 5/8" equivalent water tap.
