

Machine Readable File

- Transparency in Coverage (TIC) regulations require health insurers and group health plans to create machine-readable files (MRFs) that contain the negotiated rates for in-network providers and allow amounts derived from historical claims for out-of-network providers and make those files publicly available.

These files follow the Centers for Medicare & Medicaid Services (CMS) defined layout, are in the CMS-approved format (JSON) and are not meant for a consumer-friendly search of rates, benefits, or cost sharing.

Please refer to the member resources available through [anthem.com](https://www.anthem.com) for this information.

Find Files for an Organization

To view machine readable files for a specific employer group, an EIN search can be performed. Upon entry of a EIN, the machine readable file links for the pricing for that employer will be displayed.

Please note that when an EIN is entered, multiple links will be displayed including:

- ✓ Links to applicable In-Network Negotiated Rate
- ✓ Links to Out-of-Network Allowed Amounts File
- ✓ Links to Out-of-Area Rate Files (rates applicable when a member uses a provider in a non-Anthem state.)

9-digit EIN

When using the search option, the page will display links to several files, including:

- Applicable In-Network Negotiated Rate Files
- Out-of-Network Allowed Amount Files
- Out-of-Area Rates (applicable when members use providers in non-Anthem states.)

It will look like this:
